EDUCATION

Birla Institute of Applied Sciences

B.Tech in Computer Science and Engineering

Bhimtal, Uttarakhand, India

August 2024 – Expected May 2028

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Software Engineering, Applied Artificial Intelligence

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, C++, C, Java, Bash
- **Frameworks:** React, Node.js, Express, Apollo Server, Tailwind CSS, WebGL/Three.js
- **Tools/Platform:** Git, CI/CD, Jest, Supertest, LangChain, HuggingFace
- **Databases:** PostgreSQL, MongoDB, SQL, Vector Databases (Pinecone/Milvus)

EXPERIENCE & TRAINING

Participant / Learner | Full Stack Open (University of Helsinki)

Remote

January 2026 – Ongoing

- **Architected** REST and GraphQL APIs using Node.js and Apollo Server with Mongoose NoSQL schemas to efficiently handle complex queries and support seamless client-side data fetching.
- **Automated** comprehensive integration testing using Jest and Supertest within a CI/CD workflow, ensuring 90%+ code coverage and eliminating manual deployment errors.

PROJECTS & COMPETITIONS

AI-Based NLP Legal Summarization Engine

[GitHub](#)

Python, HuggingFace Transformers, LangChain, Vector Databases, RAG

- **Engineered** an AI-powered NLP summarization pipeline using Python and LLMs to distill dense 50-page legal contracts into precise 1-page executive summaries.
- **Orchestrated** Retrieval-Augmented Generation (RAG) by integrating vector databases to enhance semantic search accuracy and accelerate document retrieval times by 40%.
- **Deployed** autonomous AI agents via LangChain to continuously evaluate and score output quality, achieving high coherence against human benchmark summaries.

Full-Stack MERN Platforms

[GitHub](#)

Node.js, Express, React, MongoDB, GraphQL, JWT

- **Constructed** scalable MERN web applications, including a Blog API with secure JWT authentication, to securely manage user sessions and support 100+ concurrent data requests.
- **Integrated** GraphQL endpoints via Apollo Server to resolve over-fetching issues, minimizing data payloads and reducing client-side network latency by 30%.

Relational Database Applications

[GitHub](#)

Bash, PostgreSQL

- **Formulated** normalized PostgreSQL schemas and automated data pipelines using Bash scripts to ensure ACID compliance and eliminate data redundancy across 4 complex domain datasets.

CERTIFICATIONS & AWARDS

- **LLM Bootcamp**, DataTalks [Verify](#) | In Progress
- **Applied Data Science Lab**, WorldQuant University [Verify](#) | Apr 2026
- **Oracle Cloud Infrastructure AI Foundations Associate**, Oracle [Verify](#) | Oct 2025
- **Full Stack Open Certification**, University of Helsinki [Verify](#) | Jun 2026
